# hercegovina

Smještena u južnom dijelu Bosne i Hercegovine, Hercegovina je regija koja se pruža između sjevernog planinskog bedema od 2000 m nadmorske visine i nizina u južnim predjelima. Površina joj je približno 12000 km<sup>2</sup>, što je oko 23% ukupne površine države Bosne i Hercegovine. Na istoku graniči s Crnom Gorom, na sjeveru i zapadu s Bosnom, a na jugu i jugozapadu se dodiruje s Jadranskim morem i Hrvatskom. Hercegovina spada u jednu od najljepših regija u ovom dijelu Europe. Istodobno je i planinska, i nizinska i primorska, ali i kontinentalna. Satkana je od slikovitih planina, zelenih rijeka, prelijepih parkova prirode s raznovrsnom florom i faunom, kraških polja, plavoga mora, te jedinstvenog i bogatog kulturno-povijesnog naslijeđa. Hercegovina je samozatajna i nenametljiva, ali istovremeno otvorena i gostoljubiva mediteranska regija. Ovakv neotkriveni biser juga Europe je zasigurno izazov za ljubitelje prirode, sunca, svjetla, kamena i čistoga zraka. Na sljedećim stranicama je prikazan slikom i tekstom središnji ruralni dio Hercegovine, odnosno Hercegovačko-neretvanski kanton /županija s ciljem približavanja putniku svih prirodnih i društvenih vrijednosti ovoga kraja. Tko traži mir, prirodno okruženje i odmak od svakodnevnog užurbanog načina života, vjerujemo da ga može pronaći na obiteljskim poljoprivrednim gospodarstvima koja su predstavljena u ovoj brošuri. Domaćini pružaju usluge smještaja, hrane i pića, ali i ostale sadržaje namijenjene turistima koji preferiraju seosku turističku ponudu.

Located in the southern part of Bosnia and Herzegovina, Herzegovina is a region that stretches between the northern mountain wall of 2,000 m above sea level and the lowlands in the southern areas. Its surface is approximately 12,000 km<sup>2</sup>, which is about 23% of the total area of the state of Bosnia and Herzegovina. In the east it borders with Montenegro, in the north and west with Bosnia, and in the south and southwest it touches the Adriatic Sea and Croatia. Herzegovina belongs to one of the most beautiful regions in this part of Europe. At the same time it is mountainous, both lowland and coastal, but also continental. It is composed of picturesque mountains, green rivers, beautiful nature parks with diverse flora and fauna, karst fields, blue sea, and unique and rich cultural and historical heritage. Herzegovina is a subtle and unimposing but at the same time open and hospitable Mediterranean region. This undiscovered pearl of South Europe is a challenge for nature, sun, light, stone and pure air lovers. The following pages depict with pictures and text the central rural part of Herzegovina or Herzegovina-Neretva Canton, with the aim of bringing the traveller closer to all the natural and social values of this region. For those who seek peace, a natural environment, and distancing from everyday busy lifestyle, we believe it can be found on the family farms that are presented in this brochure. The hosts provide services of accommodation, food and beverage, as well as other facilities for tourists who prefer rural tourist offer.

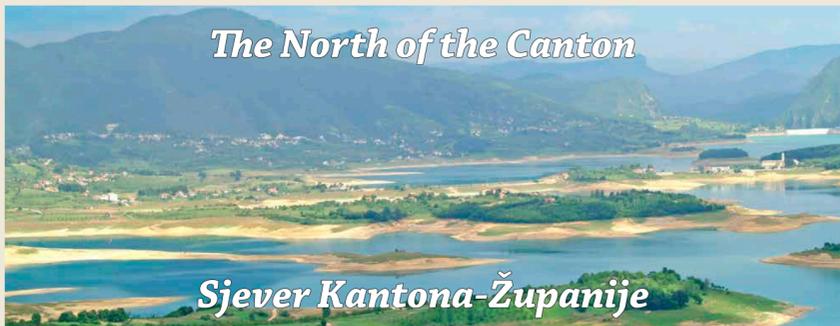

## Hercegovačko-neretvanski kanton-županija

### Herzegovina-Neretva Canton

Hercegovačko-neretvanski kanton/županija je središnja Hercegovina i proteže se od planinskog sjevera ka nizinskom jugu. Određuje ga rijeka Neretva koja izvire na sjeveru, na nadmorskoj visini od 1095 m, ispod planina Zelengore i Lebršnik i spušta se prema jugu do ušća u Jadransko more. Od izvora do ušća duga je 225 km. Pritoke su joj: Repušnica, Rakitnica, Rama, Ljuta, Ladanica, Župski Krupac, Bukovica, Bijela, Trešanica, Ildarčica, Kraljušćica, Neretvica, Ugrovača, Doljanka, Drežanka, Buna, Radobolja, Trebižat, Bregava, Krupa i Norin. Prirodne i geografske karakteristike ovog područja su raznolike, od plodnih i prostiranih polja, nepreglednih pašnjaka, rijeka i jezera, pa do stajetih listopadnih i zim zelenih šuma, te pružaju obilne mogućnosti za život i gospodarski razvitak temeljen na poljoprivrednoj proizvodnji, stočarstvu, te drvnoj industriji. Na sjeveru kantona/županije prevladava umjereno kontinentalna, na planinama planinska, a na jugu mediteranska klima. Rijeka Neretva je žila kucavica ovoga kraja. Uz nju se odvija intenzivan život i kao takva je jedan od simbola Hercegovine.

The Herzegovina-Neretva Canton is the centre of Herzegovina and it stretches from the mountainous north to the lowland south. It is defined by the Neretva River, which springs in the north, at an altitude of 1,095 m below the Zelengora and Lebršnik Mountains, and descends to the south to its estuary into the Adriatic Sea. From its source to the mouth it is 225 km long. Its tributaries are: Repušnica, Rakitnica, Rama, Ljuta, Ladanica, Župski Krupac, Bukovica, Bijela, Trešanica, Ildarčica, Kraljušćica, Neretvica, Ugrovača, Doljanka, Drežanka, Buna, Radobolja, Trebižat, Bregava, Krupa and Norin. The natural and geographical characteristics of this area are varied, from fertile and spacious fields, vast pastures, rivers and lakes, to centuries-old deciduous and evergreen forests, so providing abundant opportunities for life and economic development based on agricultural production, livestock breeding and wood industry. In the north of the Canton dominates moderately continental, on the mountains mountainous, and in the south Mediterranean climate. The Neretva River is the lifeline of this region. The life is intense along its coasts, and as such Neretva is one of the symbols of Herzegovina.

## Gastronomija Agroturizam Hercegovina/ Gastronomy of Herzegovina Agritourism

### The North of the Canton

### Sjever Kantona-Županije

Mikroregija gornja Hercegovina obuhvaća područja općina Konjic, Jablanica i Prozor/Rama. Reljef i vegetacija na ovim područjima se vidno razlikuju od ostatka Hercegovine. Klima je umjereno kontinentalna, a klimatski uvjeti i u planinskim mjestima su idealni zahvaljujući utjecaju mediteranske klime koja prodire dolinom rijeke Neretve i Rame. Cijeli ovaj kraj je od pamtivjeka bio privlačan za čovjekova naselja. Prirodni uvjeti područja čine atraktivnu osnovu za razvoj gotovo svih oblika kontinentalnog turizma. Obiluje brojnim površinama četinarskih šuma: bor, jela, smreka, čempresi, itd., koji stvaraju prekrasne planinske i brdske pejzaže u svako doba godine. Cijelo područje krasi jezera od kojih su najpoznatija Ramsko, Jablaničko i Boračko jezero. Kanjon rijeke Neretve sa svojim strminama i netaknutom prirodom stvara nevjerojatne prizore. Planinskim vrhovima teku potoci praveći usjeke preko kojih tekućice stvaraju vodopade izuzetne ljepote. Na ovom ruralnom području turisti se mogu baviti prigodnim aktivnostima kao što su: planinarenje, logorovanje, rafting, ribolov, vožnja kajakom ili kanoom, biciklizam, paragliding, itd. Ako igdje priroda daje onda daje na ovome području. Uz nevjerojatnu prirodnu raznolikost, čistu vodu i zdravu hranu, boravak ovdje je odmor za dušu i tijelo. Sjeverna Hercegovina, u zagrljaju planina, je doista turistički atraktivna u svako doba godine. Nepregledni prostori čistih livada i šuma, s izvorima i jezerima, netaknutom prirodom i zdravim podnebljem, pružaju posjetiteljima neiscrpne mogućnosti za uživanje.

The micro-region of Upper Herzegovina encompasses the municipalities of Konjic, Jablanica and Prozor/Rama. Relief and vegetation in these areas are distinctly different from the rest of Herzegovina. The climate is moderately continental, and climatic conditions in mountainous areas are ideal thanks to the influence of the Mediterranean climate that penetrates through the valley of rivers Neretva and Rama. This whole area has always been attractive for human settlements. The natural conditions of the area make an attractive base for the development of almost all forms of continental tourism. It features many coniferous forests: pine, fir, spruce, cypress, etc., which create beautiful mountain landscapes at all times of the year. There are also many lakes, among which the best known are Ramsko, Jablaničko and Boračko Lake. The Neretva River Canyon with its steepness and untouched nature creates incredible sights. Water streams on the mountain peaks flow over ravines and create waterfalls of exceptional beauty. In this rural area, tourists have the opportunity to experience many interesting activities such as: hiking, camping, rafting, fishing, kayaking or canoeing, biking, paragliding, etc. If there is place where the nature has been generous, it is this area. With incredible natural diversity, clean water and healthy food, staying here is a vacation for the soul and body. Northern Herzegovina, in the mountains' embrace, is truly a tourist attraction at all times of the year. Vast areas of clean meadows and forests, with springs and lakes, intact nature and healthy environment, provide visitors with inexhaustible opportunities for enjoyment.

### The South of the Canton

### Jug Kantona-Županije

Grad Mostar je središte Hercegovine u svakom pogledu. Po svojim geografskim značajkama pripada mikroregiji južna Hercegovina. Pored Mostara, ovu mikroregiju čine i područja općina Čitluk, Čapljina, Stolac, Ravno i Neum. Južna Hercegovina je mediteranska mikroregija u pravom smislu riječi. Blizina Jadranskoga mora, nadmorska visina i reljef određuju njenu klimu i vegetaciju. Ovaj krški prostor karakteriziraju topla ljeta i blage zime na kojem prevladavaju dva vjetrova: sjeverni (u narodu zvan bura) i južni koji dolazi s mora (zvan jugo). Prostor južne Hercegovine prekrivaju autohtone i sredozemne biljke koje u kombinaciji sa sivim vapnencem stvaraju romantične i nezaboravne slike. Pored ljekovitih biljaka, ovdje uspijevaju i kulture kao što su: masline, mandarine, narandže, smokve, vinova loza, šipak, itd. Cijeli prostor ukrašava i visoko raslinje poput hrasta, jasena i graba. Na ovom ruralnom području turisti su u mogućnosti imati niz prigodnih aktivnosti kao što su: promatranje ptica, kampiranje, vožnja kajakom, ribolov, lov, fotografiranje, ronjenje, posjete parkovima, farmama, voćnjacima, itd. Od sjevera gdje izvire, pa sve do Jadranskoga mora, rijeka Neretva čini ovaj kraj najplodnijim u Bosni i Hercegovini. Ovdje se proizvode paprika, rajčica, špinat, raštika, blitva, zelene salate, luk, lubenice, itd., koji hercegovačku kuhinju zasigurno svrstavaju u red zdravih mediteranskih kuhinja. Područje južne Hercegovine pruža mogućnosti ponude izvornih proizvoda od mesa i mlijeka; gastronomskih specijaliteta, vrhunskih vina, rijetkih vrsta voća - koje zbog svoje specifičnosti, načina uzgoja i prerade, daju za pravo nazvati ih "originalnim hercegovačkim proizvodima".

The City of Mostar is the centre of Herzegovina in every respect. By its geographical features it belongs to the micro-region of southern Herzegovina. In addition to Mostar, this micro-region is made up of the municipalities of Čitluk, Čapljina, Stolac, Ravno and Neum. Southern Herzegovina is the Mediterranean micro-region in the true sense of the word. The vicinity of the Adriatic Sea, altitude and relief determine its climate and vegetation. This karst area is characterized by warm summers and mild winters with two winds: northern (called 'bura') and the south that comes from the sea (called 'jugo'). The territory of southern Herzegovina is covered by autochthonous and Mediterranean plants, which, combined with grey limestone, create romantic and unforgettable images. In addition to medicinal herbs, plants such as olives, mandarins, oranges, figs, grapevines, pomegranates, etc. are also cultivated here. The entire area is also adorned by the high vegetation of oak, ash and hornbeam. In this rural area, tourists are able to have a series of activities such as bird watching, camping, kayaking, fishing, hunting, photography, scuba diving, visits to parks, farms, orchards, etc. From the north to the Adriatic Sea, the Neretva River makes this region the most fertile in Bosnia and Herzegovina. Peppers, tomatoes, spinach, borecole, Swiss chard, lettuce, onion, watermelon, etc., which place the Herzegovinian cuisine among other healthy Mediterranean cuisines, are produced here. The territory of southern Herzegovina provides opportunities to offer original products of meat and milk; gastronomic specialties, top quality wines, rare species of fruits, which because of their specificity, manner of breeding and processing, give the right to call them "original Herzegovinian products".
